We are looking for a box builder functionality for Shopify. The app should display an image of the user's box that includes chocolates that they select. We will provide all graphics, design, and images for the chocolates and boxes.

Desktop and tablet over 1080: side by side orientation.

short name of the chocolate, stored in either the product name or meta field.

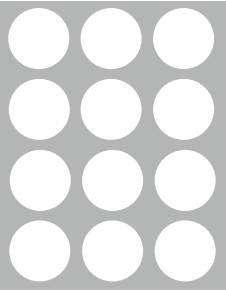

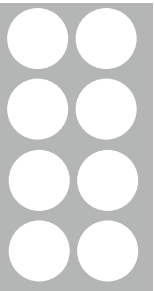

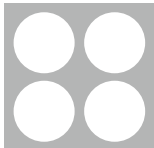

Mobile or under 1080px: stacked with the box image on top.

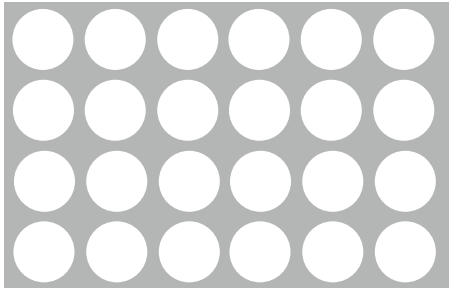

Images of the chocolates and the box should scale to the user's screen.

Expected customer experience:

Step 1

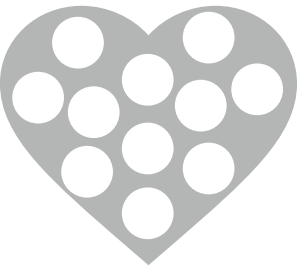

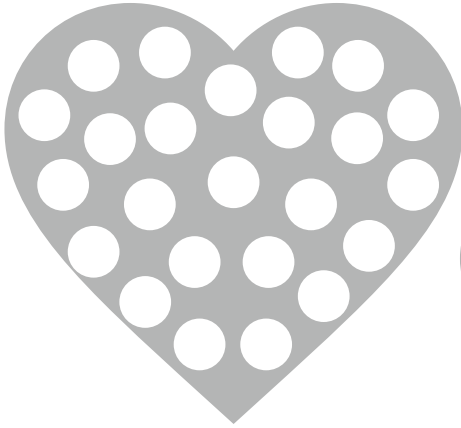

Choose Box: These boxes should be configured as separate products, so they can be displayed separately. We will provide the graphics. These are the options that they should support.

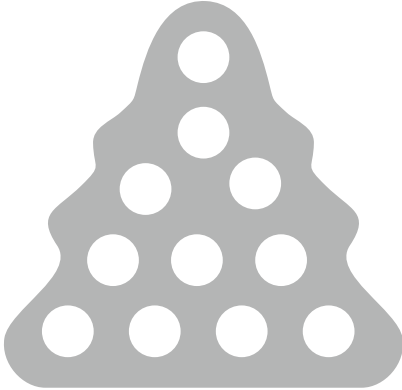

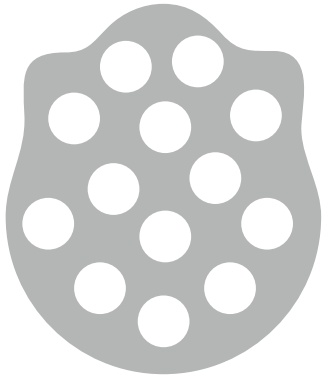

Standard Boxes

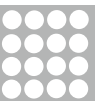

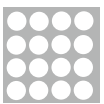

- 2 Piece Box
- 4 Piece Box
- 8 Piece Box
- 12 Piece Box
- 24 Piece Box

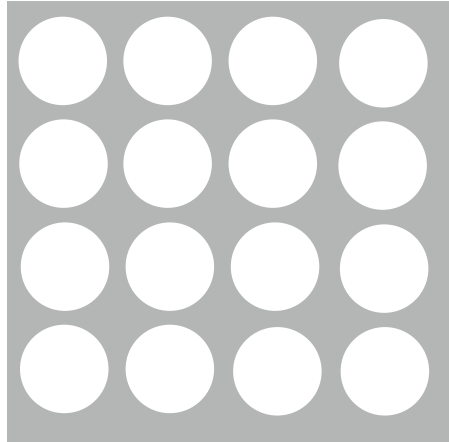

Shaped Boxes

- 11 Piece Heart Box
- 24 Piece Heart Box
- Christmas Tree Box
- Santa Box

Layer 1 Layer 2 Layer 3 Layer 4

Layered Box

- One Layer Box (16 pieces)
- Two Layer Box (32 pieces)
- Three Layer Box (48 pieces)
- Four Layer Box (64 pieces)

Expected customer experience:

Step 2

Choose Candies:

Sugar-free or Regular?

The two collections cannot be mixed in the same box.

User will choose from approx. eight sugar-free chocolates or approx. 23 regular chocolates.

We will create these collections of chocolates. They should be able to be changed later.

Each selected chocolate fills the first available slot.

Please refer to Holls site example for more details.

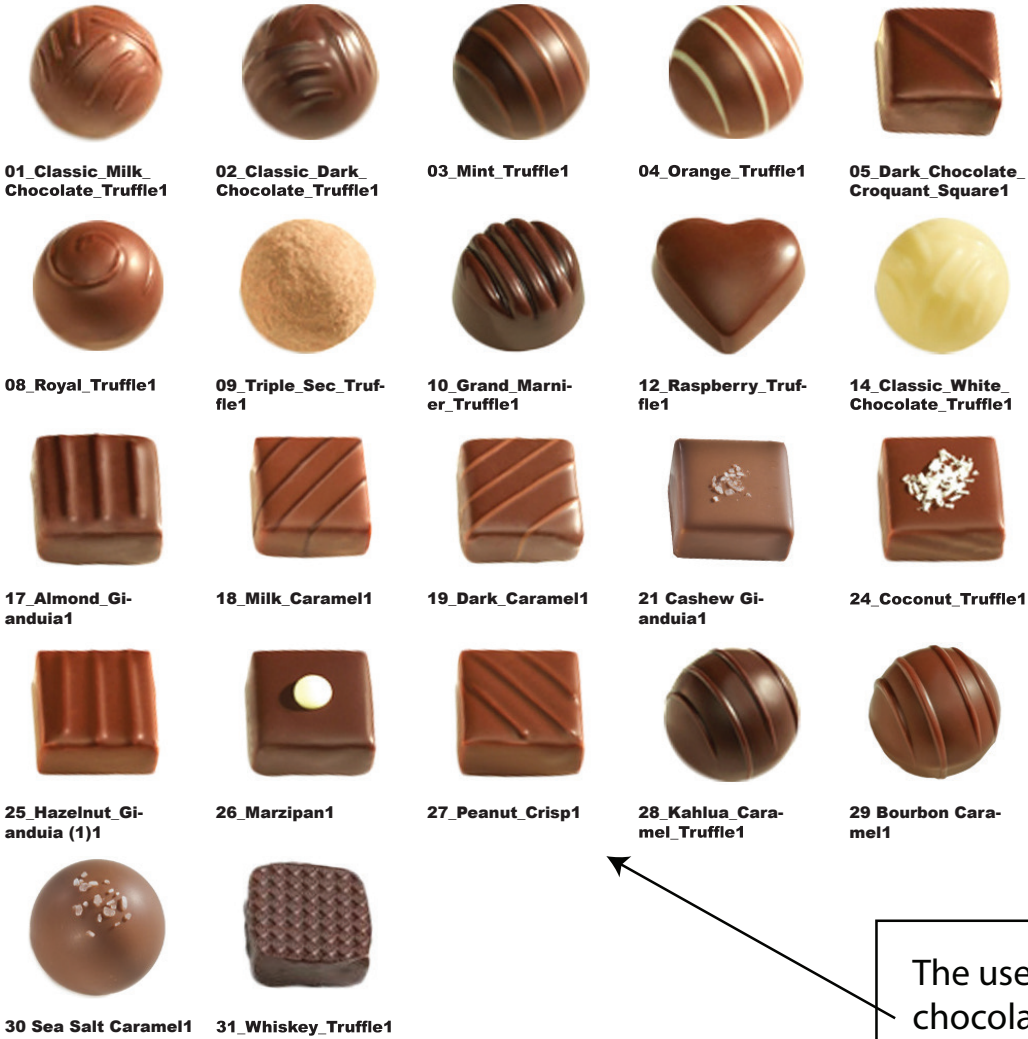

User can click on the chocolate in the box for an option to remove the chocolate.

Add To Cart

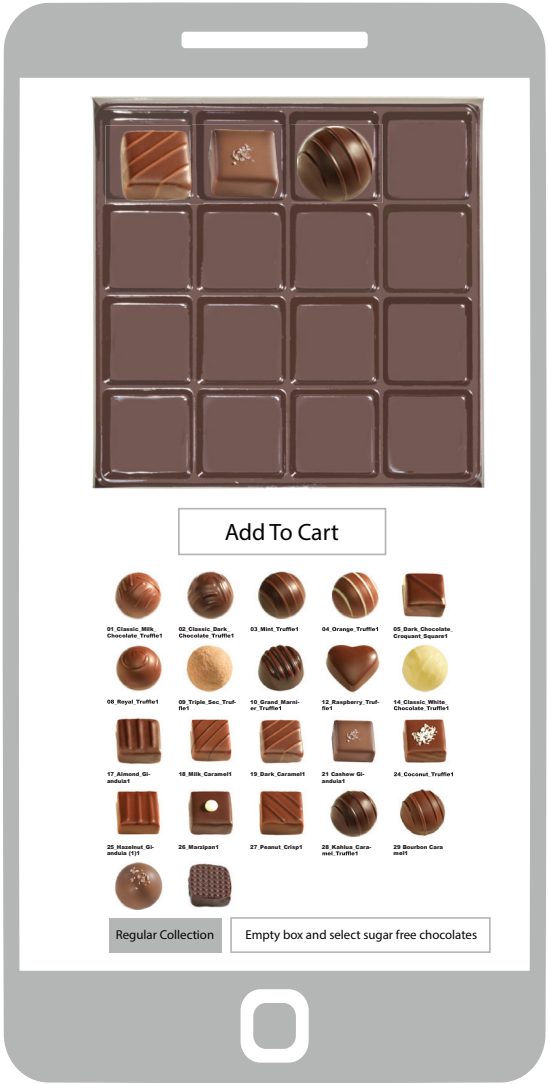

Regular Collection

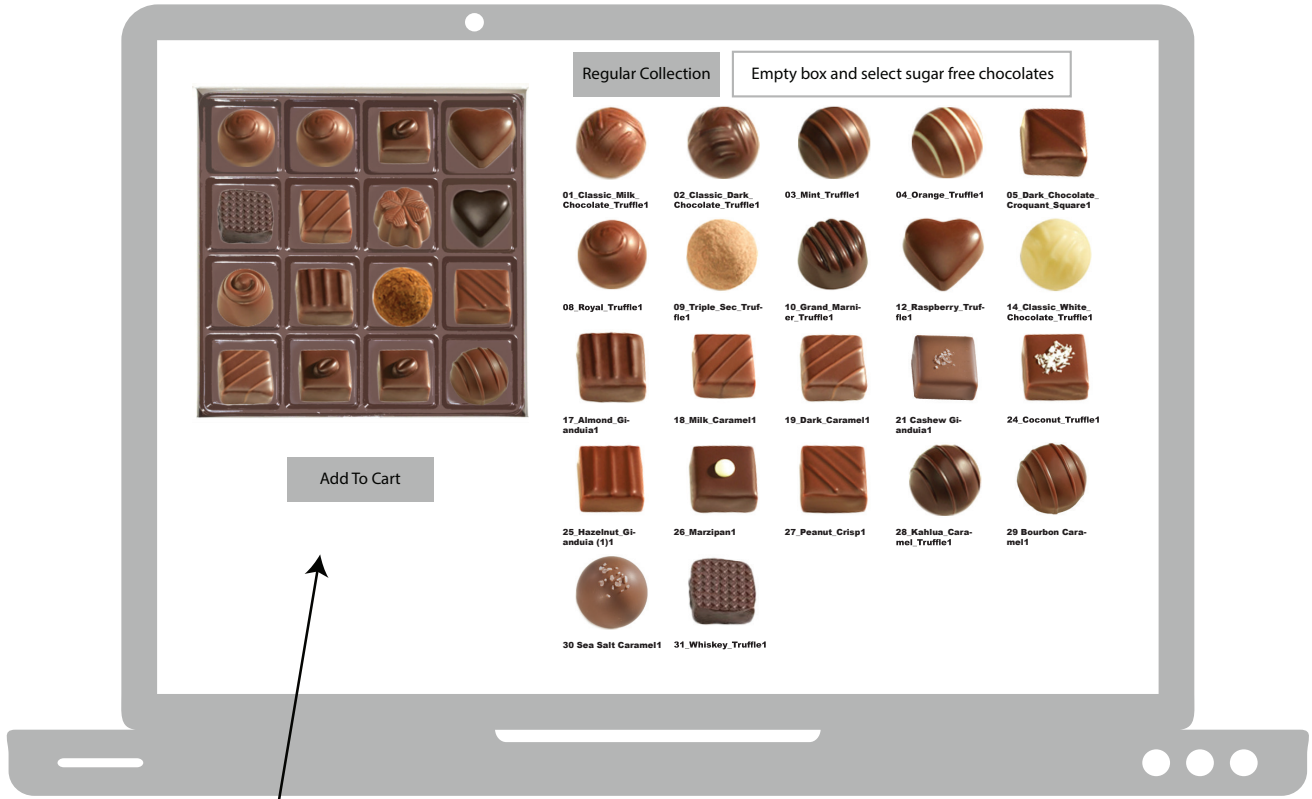

Empty box and select sugar free chocolates

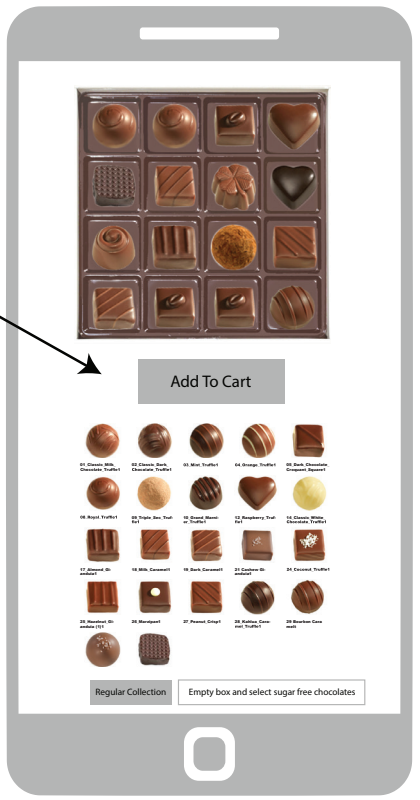

The user should select their chocolates and see an image of their box with selected chocolates.

When a chocolate is selected, it goes to the first available slot. If a chocolate is removed, the next chocolate selected will fill that slot.

User can add custom box to their cart when the box is full. Cart thumbnail is an image of the filled box.

Expected customer experience:

Step 3

Add to cart

The item is added to the shopping cart as a single product with information about each chocolate selection. The order of the chocolates does not matter, but quantity of each chocolate is aggregated. See example:
